PROFESSIONAL SUMMARY

Computer Science graduate with experience delivering data-driven projects, optimizing processes, and solving operational challenges. Strong analytical mindset, cross-functional collaboration skills, and ability to drive measurable business outcomes. Semi-finalist at Smart India Hackathon (top 50 of 5,000+ teams). Seeking Business Analyst or Operations roles at MNCs or mid-size companies.

KEY COMPETENCIES

Process Optimization · Requirement Analysis · Data-Driven Decision Making · Agile Workflows · Stakeholder Management · Product Thinking · Cross-functional Collaboration

SKILLS

Analytical: Data Analysis, Process Mapping, Root Cause Analysis, Requirement Gathering, Gap Analysis
Tools: MS Excel, Google Sheets, Postman, Notion, Git, GitHub, Docker
Data: MySQL, PostgreSQL, MongoDB — SQL querying & data management
Domain: Agile/Scrum, SDLC, Product Lifecycle, Workflow Optimization, Documentation

EXPERIENCE

Web Developer Intern | CoGrad

Sep 2024 – Nov 2024 | Greater Noida (Hybrid)

- Collaborated with stakeholders to gather requirements and delivered a recruitment portal serving 50+ beta users, receiving 5-star satisfaction feedback
- Identified a critical performance bottleneck, reducing page load time by 66% (3.2s → 1.1s) — improving user retention and operational efficiency
- Coordinated deployment and QA across teams using CI/CD pipelines, ensuring on-time delivery with zero post-launch critical issues

PROJECTS

Placement Drive Tracker | React.js, Next.js, Node.js, MongoDB

- Analyzed campus placement workflow gaps and built a centralized tracking system for 200+ students, improving efficiency by 80%
- Reduced data retrieval time by 89% (1.8s → 200ms) through query optimization — identifying and fixing process bottlenecks using data

Seniorly — Student Mentorship Platform | React.js, Next.js, MongoDB

- Identified student-mentor mismatch problem and led end-to-end product delivery — from requirements and UI design to launch — connecting 100+ users
- Implemented secure authentication and optimized assets, reducing bundle size by 40%

EHR System — Electronic Health Records | React.js, Node.js, MongoDB, Docker

- Delivered a secure health record-sharing platform with sub-5s upload latency; managed containerized deployment for scalable infrastructure

EDUCATION

B.Tech in Computer Science (AI) | CGPA: 7.2 | ABES Institute of Technology 2022 – 2026 | Ghaziabad, UP

Intermediate (12th) | 83% | St. Anthony's Sr. Sec School

2021 | Fatehgarh, UP

ACHIEVEMENTS

- National Semi-Finalist, Smart India Hackathon 2023 & 2024 — Top 50 of 5,000+ teams; recognized for problem-solving, rapid execution, and cross-functional teamwork**
- Participated in 10+ national hackathons · Attended IIT Delhi Blockchain & Web3 workshops
